

ARCHEOLAB

Summer Archaeology Workshop

This summer in Budva children will have the opportunity to find out what it actually means to be an **ARCHAEOLOGIST**

GOAL

Learning that beneath the earth's surface there is an entire world that awaits to be discovered, and that famous archaeological findings need not only be made at the excavation sites in the distant exotic lands, but can rather be made beneath the road we walk on almost every day.

ARCHEOLAB

Ljetnja arheološka radionica

Ovog ljeta u Budvi djeca će imati priliku da saznaju šta zapravo znači biti **ARHEOLOG**

CILJ

Otkriti da se ispod površine zemlje nalazi čitav jedan svijet koji samo čeka da bude otkriven, te da se famozni arheološki nalazi ne pronalaze samo na arheološkim iskopavanjima u dalekim egzotičnim zemljama, već da se mogu pronaći i ispod puta kojim koračamo svaki dan.

RESULTS

Stimulation of the learning process and motivation of creativity by placing the artefacts in a context specified by the place of their discovery;
Reconstruction of the ancient territories through recognition and examination of plant remains (Archaeobotany);
Recognition of the different types of animals that used to live on our planet (Archaeozoology).

REZULTATI

Stimulacija procesa učenja i motivacija kreativnosti stavljajući artefakte unutar određenog konteksta kojem samim pronalaskom pripadaju;
Rekonstrukcija teritorija u davni putem prepoznavanja te proučavanja biljnih ostataka (arheobotanika);
Spoznavanje o tipovima životinja koje su nekada davno živjele na našoj planeti (arheozoologija).
